1. INTRODUCTION

1.1 Purpose of this Document

This Standard Operating Procedure (SOP) provides a comprehensive reference guide for all users of the TUBA Smart Court platform — also referred to as CourtOS. It covers every module, workflow, role, and administrative function available in the system, and is intended to serve as the single authoritative operational manual for advocates, law firm administrators, legal clerks, and IT administrators.

1.2 Product Overview

TUBA Smart Court is an AI-powered, cloud-based Legal Practice Management Platform purpose-built for the Indian legal ecosystem. It unifies five core capabilities into a single workspace:

- Digital Advocate Diary with smart scheduling and court calendar integration
- Matter Management System covering all stages from intake to closure
- Court Tracking Engine with live case status across 20+ court forums
- Document Management System (DMS) with OCR and version control
- AI Legal Assistant for matter summarisation, research and drafting

Tagline: "One Platform for Every Matter, Every Court, Every Hearing."

1.3 Supported Forums

TUBA Smart Court tracks cases across the following judicial and quasi-judicial forums in India:

- Supreme Court of India
- All High Courts (Delhi, Bombay, Madras, Calcutta, Allahabad, Karnataka, Gujarat, P&H, etc.)
- District & Sessions Courts via eCourts integration
- NCLT / NCLAT — National Company Law Tribunal
- ITAT — Income Tax Appellate Tribunal
- RERA — Real Estate Regulatory Authority (all states)
- DRT / DRAT — Debt Recovery Tribunal
- Consumer Forums — NCDRC, SCDRC, DCDRC
- CAT — Central Administrative Tribunal
- SAT — Securities Appellate Tribunal
- GST Appellate Tribunals
- Labour Courts and Industrial Tribunals

1.4 Key Stakeholders & User Roles

Role	Dashb oard	Matter s	Clients	DMS	Billing	User Mgmt	Master s
Admin (Firm Owner)	✓	✓	✓	✓	✓	✓	✓
Senior Advocate	✓	✓	✓	✓	✓	✗	✗

Role	Dashb oard	Matter s	Clients	DMS	Billing	User Mgmt	Master s
Advocate	✓	✓ (own)	✓	✓	View	✗	✗
Clerk / Paralegal	✓	View	View	✓	View	✗	✗
Read-only	✓	View	View	View	✗	✗	✗

2. GETTING STARTED — LOGIN & ONBOARDING

2.1 System Access

TUBA Smart Court is accessible via any modern web browser (Chrome, Edge, Firefox, Safari). A Progressive Web App (PWA) version is available for installation on Android and iOS devices. No local software installation is required.

Web URL	https://app.tubasmartcourt.in
Mobile App	Android & iOS (PWA installable)
Supported Browsers	Chrome 110+, Edge 110+, Firefox 110+, Safari 16+
Screen Resolution	Minimum 1280×768 (responsive on mobile)

2.2 Login Procedure

1	Open Login Page Navigate to the platform URL. The login screen displays the TUBA Smart Court branding with a light-blue left panel.
2	Enter Credentials Enter your registered Email ID and Password in the provided fields. Tick 'Remember me' to stay logged in on trusted devices.
3	Multi-Factor Authentication (MFA) Upon successful credential verification, a 6-digit OTP is sent to your registered mobile/email. Enter the OTP in the six boxes. Each box auto-advances on entry.
4	Access Dashboard On successful MFA verification, you are redirected to the Advocate Dashboard. The navy-blue sidebar displays your assigned navigation based on role.

2.3 Forgot Password

1. Click 'Forgot password?' on the login screen.
2. Enter your registered email address and click 'Send OTP'.
3. Enter the received 6-digit OTP on the verification screen.
4. On verification, you will be prompted to set a new password.
5. New password must be minimum 12 characters with at least one special character (per firm policy).

2.4 First-Time User Activation

New users receive an email invitation from the firm Admin. The activation link is valid for 48 hours. On first login, MFA setup is mandatory — the user must register their mobile number for OTP delivery. Biometric login can optionally be configured post-activation.

3. ADVOCATE DASHBOARD

3.1 Overview

The Dashboard is the default landing screen after login. It provides a real-time executive summary of the firm's entire legal practice, grouped into six key intelligence zones. All figures on the dashboard are clickable and navigate to the corresponding detailed module.

3.2 Dashboard Zones

3.2.1 Quick Actions Bar

Eight one-click shortcut buttons are displayed at the top: New Matter, Track Case, Add Client, Add Task, New Filing, Ask AI, Generate Invoice, and Upload Document. These allow immediate action without navigating through the sidebar.

3.2.2 Case Statistics

Six KPI cards display: Active Matters, Cases Closed This Year, Hearings Today, Hearings This Week, Pending Filings, and Open Tasks. Each card is colour-coded (green = healthy, amber = attention, red = urgent) and shows a trend indicator against the prior period.

3.2.3 Today's Cause List

Live preview of the day's scheduled hearings. Each row shows the case title, case number, court/bench, time, and urgency status. Rows with red left-border indicate urgent matters. Click any row to open the full matter detail.

3.2.4 Smart Legal Timeline

A chronological timeline of past and future legal events — hearings, filing deadlines, client meetings, orders, and judgments. Urgent items are marked with a pulsing red dot. The timeline is scrollable and extends up to 90 days forward.

3.2.5 Pending Tasks

Top four open tasks with their assigned advocate, due date, and status badge. Overdue tasks are highlighted in red. Click 'All Tasks' to open the full task workspace.

3.2.6 Cases by Court

Horizontal progress bars showing distribution of active matters across court forums — Supreme Court, Delhi HC, NCLT/NCLAT, District Courts, ITAT, and Consumer/RERA. Useful for capacity planning and advocate assignment.

3.2.7 Team Performance

Progress bars showing each advocate's task completion rate for the current month. Allows the firm head to identify workload imbalances and intervene proactively.

3.2.8 Revenue Widget

Displays collected vs. overdue billing amounts for the current month, with a daily bar chart showing billing activity across the working week.

3.3 Alert Banner

A persistent red alert banner appears when there are urgent hearings on the current day. It displays the count and court details, and links directly to the Cause List page. The banner can be dismissed but reappears upon next login if matters remain urgent.

4. CAUSE LIST MANAGEMENT

4.1 Overview

The Cause List module provides a consolidated daily view of all scheduled court hearings across all forums. Data is auto-fetched every morning at 6:00 AM via court API integrations and WhatsApp alerts are dispatched to all assigned advocates.

4.2 Navigating the Cause List

- Use the filter pills — All / Supreme Court / High Courts / Tribunals / Urgent — to narrow the view.
- The date header shows the current date; previous and future dates are accessible via the date navigator.
- Each row displays: Serial No., Case Title, Case Number, Court & Bench, Hearing Time, Stage, Assigned Advocate, and Status.
- Click any row to open the full Matter Detail popup with timeline, documents, and task tabs.

4.3 Status Codes

Status	Meaning	Colour
Urgent	Hearing is today and high priority (e.g., final arguments, urgent application)	Red
Ready	All documents filed; advocate prepared and confirmed	Green
Pending	Hearing is scheduled but preparation is pending	Amber
Filed	Matter has already been heard/order passed today	Green

4.4 Export & Sharing

Click 'Export' to download the day's cause list as a PDF or Excel file. The PDF format is suitable for printing and sharing with clients. The 'Refresh' button manually triggers a re-fetch from court APIs.

5. CLIENT MANAGEMENT

5.1 Adding a New Client

1	Open Add Client Modal Click 'Add Client' from the Quick Actions bar on the Dashboard, or click the '+ Add Client' button on the Clients page.
2	Select Client Type Choose from: Individual, Corporate, Government, PSU, Partnership Firm, LLP, Trust, or NGO. This type is sourced from the Client Types master.
3	Fill Client Details Enter: Client Name, Mobile, Email. For corporate clients also enter GST Number, PAN, Authorized Signatory name, and registered address.
4	Save Click 'Add Client'. The system auto-generates a Client Code (CLT-001, CLT-002, etc.) and the client becomes immediately available in all matter and billing dropdowns.

5.2 Client Directory

The Clients page displays all clients in a tabular format with columns: Client Code, Name, Type, Mobile, PAN, No. of Matters, and Status. Use the filter pills to narrow by type (Individual / Corporate / Government). Use the search box to find clients by name or code.

5.3 Client Information Captured

- Client Code (auto-generated)
- Client Name (Individual / Company)
- Client Type (from Master)
- Mobile & Email
- PAN Number & Aadhaar
- GST Number
- Authorized Signatory
- Registered Address
- KYC Documents (uploaded to DMS)
- Communication History (calls, emails, WhatsApp)

6. MATTER MANAGEMENT

6.1 Registering a New Matter

1	Open New Matter Click '+ New Matter' (topbar button) or the Quick Action shortcut. The 'Register New Matter' modal opens.
2	Select Matter Type Choose from the Matter Types master (Litigation, Arbitration, Advisory, IBC/NCLT, Compliance, Tax Matter, Consumer, Real Estate, Criminal, etc.).
3	Assign Client Select the client from the dropdown. If the client does not exist, use the Add Client modal first.
4	Enter Matter Title Enter a descriptive matter title. Example: 'Constitutional Challenge to GST Act — Section 17(5) ITC Restriction'.
5	Select Court & Practice Area Choose the Court/Forum and Practice Area from the masters. These drive the cause list filtering and reporting.
6	Assign Advocate Assign the primary responsible advocate from the Advocates master. Additional team members can be added from the matter detail view.
7	Enter Case Number If the case number is already known (e.g., for a transferred matter), enter it. Otherwise leave blank — it can be updated later.
8	Add Opposite Party Enter the respondent/opposite party name for future reference and tracking.
9	Background Notes Enter key background facts, legal issues, client expectations, and initial risk assessment in the background text area.
10	Register Click 'Register Matter'. The system assigns a Matter Number (M-YYYY-NNN) and the matter becomes active across all modules.

6.2 Matter Detail View

Click any matter row to open the Matter Detail modal, which has four tabs:

- **Summary** Summary — Core matter fields, background notes, and quick-action buttons (Add Task, Upload Doc, Add Note).
- **Timeline** Timeline — Chronological history of all hearings, filings, orders, and notes from filing date to present.
- **Documents** Documents — All documents filed to this matter from the DMS, with type, date, and status badges.
- **Tasks** Tasks — All open and completed tasks linked to this matter.

6.3 Matter Filters

Use the filter pills on the Matters page to filter by type: All / Litigation / Arbitration / Advisory / IBC. Use the search box to search by matter title, client name, or matter number.

6.4 Matter Understanding Sheet

Each matter contains a structured Matter Understanding Sheet (accessible from the Summary tab) capturing: Background, Facts, Client Expectations, Legal Issues, Applicable Laws, Risk Assessment, Success Probability, and Opposite Party Details. This sheet can be generated as a PDF for client briefings.

7. COURT TRACKING ENGINE

7.1 Overview

The Court Tracking Engine allows any user to search for live case status across all supported court forums simply by entering a case number or CNR number. The system fetches real-time data via court API integrations and displays full hearing history.

7.2 How to Track a Case

1	Navigate to Court Tracker Click 'Court Tracker' in the sidebar under Practice.
2	Select Court Choose the court from the dropdown (sourced from the Courts master).
3	Select Search Type Choose: Case Number / CNR Number / Diary Number / Party Name.
4	Enter Case Number Type the case number (e.g., WP(C) 1247/2024) and click 'Track'.
5	View Results The system displays: Case Number, Court, Next Hearing Date, Current Stage, Petitioner, Respondent, and full Hearing History table.

7.3 Data Fetched

- Current Status and Stage
- Next Hearing Date
- Court Number and Bench Composition
- Petitioner and Respondent Details
- Filing Date and Registration Date
- Full Chronological Hearing History (date, stage, order/remark, next date)
- Uploaded Orders and Judgments

7.4 Auto-Sync

For matters already registered in the system, the Court Tracker auto-syncs daily at 6:00 AM. Any change in court date, stage, or order is automatically reflected in the matter timeline and triggers relevant notifications.

8. TASKS & WORKFLOW MANAGEMENT

8.1 Overview

The Tasks module provides a full task management workspace for all legal work items. It supports two views — Kanban Board and List View — and is directly integrated with matters, advocates, and filing deadlines.

8.2 Creating a Task

1	Open New Task Click '+ New Task' on the Tasks page or use the Quick Action button.
2	Enter Title Enter a descriptive task title. E.g., 'Draft Written Submissions — ABC Infra v. NHA!'
3	Link to Matter Select the relevant matter from the dropdown.
4	Set Priority Choose: Urgent / High / Medium / Low (from Priorities master).
5	Set Due Date Pick the due date. The system will flag overdue tasks in red.
6	Assign Advocate Select the responsible advocate from the Advocates master.
7	Set Task Type Choose from the Task Types master (Draft Petition, Research, Court Appearance, Filing, etc.).
8	Save Click 'Create Task'. The task appears in the appropriate Kanban column.

8.3 Kanban Board

The Kanban board has four columns: To Do, In Progress, Under Review, and Done. Tasks are auto-placed based on their status. The column header shows the count of tasks in each stage. Tasks can be clicked to view details. Priority level is indicated by the left border colour — red for Urgent, amber for High, grey for Normal.

8.4 List View

Toggle to List View using the pill buttons. The list shows all tasks in a table with Done checkbox, Title, Matter, Priority, Due Date, Assigned Advocate, and Status columns. Clicking the Done checkbox immediately marks the task complete and updates the dashboard counters.

8.5 Task Status Flow

Status	Description	Colour
To Do	Created, not yet started	Grey
In Progress	Work actively underway	Blue
Due Today	Due date is today	Red
Overdue	Past due date, not completed	Red
Under Review	Completed draft awaiting senior review	Amber
Done	Task completed and accepted	Green

9. FILING MANAGEMENT

9.1 Overview

The Filing module tracks the lifecycle of every legal document from draft creation to physical/e-filing in court. It ensures no filing deadline is missed and maintains a complete audit trail of approvals and signatures.

9.2 Creating a Filing

1	Open New Filing Click '+ New Filing' on the Filings page or Quick Action button.
2	Select Document Type Choose from the Document Types master: Petition, Affidavit, Vakalatnama, Written Submissions, Rejoinder, Synopsis, Application, etc.
3	Link to Matter Select the relevant matter.
4	Select Court Select the court where filing is to be made.
5	Set Due Date Set the deadline for filing. The system will send alerts 3 days before and on the due date.
6	Add Description Enter a brief description of the filing's purpose.
7	Save Click 'Create Filing'. The filing enters the system at 'Draft' stage.

9.3 Filing Stage Lifecycle

Stage	Description	Action Required
Draft	Document is being prepared	Assigned advocate to draft
Under Review	Draft submitted for senior review	Senior advocate to review
Approved	Reviewed and approved for signing	Obtain client signature
Signed	Client/advocate signed	Proceed to file in court
Filed	Physically or e-filed in court	Update filing number
Defects Raised	Court registry raised objections	Rectify defects within deadline
Defects Cleared	Defects rectified and resubmitted	Monitor for acceptance
Returned	Filing rejected; new filing needed	Create new filing entry

9.4 Filters

Use filter pills to view: All / Draft / Approved / Filed / Defects. Due Today items are highlighted with a red due date.

10. DOCUMENT MANAGEMENT SYSTEM (DMS)

10.1 Overview

The DMS provides a structured digital repository for all legal documents linked to matters. It supports folder-based organisation, version control, OCR-based text search, tagging, watermarking, and check-in/check-out controls.

10.2 Folder Structure

Documents are organised into matter-linked folders automatically when uploaded with a matter assignment. The DMS sidebar displays all matter folders with document count and last-updated date.

10.3 Uploading a Document

1	Open Upload Modal Click 'Upload' on the Documents page or use the Quick Action button.
2	Drag & Drop or Browse Drag files into the upload zone or click to browse. Supported formats: PDF, DOCX, XLSX, JPG, PNG up to 50 MB per file.
3	Link to Matter Select the matter this document belongs to.
4	Select Document Type Choose from the Document Types master.
5	Add Tags Enter relevant tags (e.g., 'Affidavit', 'Draft', 'SC', 'Signed') for fast retrieval.
6	Upload Click 'Upload'. The system stores the file, extracts OCR text for search, and logs the upload in the audit trail.

10.4 DMS Features

- Version Control — each re-upload of the same document creates a new version; prior versions remain accessible.
- OCR Full-Text Search — search inside scanned PDFs and images using the search bar.
- Tagging & Metadata — tag documents with keywords, matter numbers, and custom labels.
- Check-In / Check-Out — lock a document while editing to prevent concurrent modification.
- Watermarking — apply 'Draft', 'Confidential', or 'Filed' watermarks on download.
- Storage Options — Local server, Cloud (S3-compatible), or Hybrid.

11. AI LEGAL ASSISTANT

11.1 Overview

The AI Legal Assistant is an intelligent chat interface trained on the firm's live matter data, legal knowledge base, and Indian case law. It answers natural-language queries about matters, hearings, tasks, documents, and legal research without requiring the user to navigate multiple screens.

11.2 How to Use

1	Open AI Assistant Click 'AI Assistant' in the sidebar under Knowledge. The chat interface opens.
2	Type Your Query Type a question in plain English. Examples are suggested in the input placeholder.
3	Press Enter or Send Click the Send button or press Enter. The AI responds within 1–2 seconds.
4	Follow Up Continue the conversation naturally. The AI retains context within the session.

11.3 Sample Queries & Responses

Query	AI Response Summary
"Show hearings today"	Lists all scheduled hearings with court, time, and advocate.
"Summarize Sharma & Sons matter"	Returns matter background, stage, next hearing, assigned advocate.
"What filings are pending?"	Lists overdue and due-today filings with filing numbers.
"Task status for Priya Kapoor"	Shows open tasks assigned to Adv. Priya Kapoor with priorities.
"Billing status for ABC Infra"	Returns invoice history, outstanding amount, and last payment.
"What is the NCLT admission timeline?"	Explains the typical IBC Section 7 admission process from filing to CIRP.

11.4 Future AI Capabilities

- AI Matter Summarisation — auto-generate one-page matter summary sheets.
- AI Draft Generation — generate petition drafts, affidavits, and written submissions.
- AI Legal Research — cite relevant judgments for a given legal issue.
- AI Hearing Prediction — predict next hearing date based on court patterns.
- AI Compliance Monitoring — flag missed compliances and regulatory deadlines.
- AI Document Classification — auto-tag and categorise uploaded documents.

- AI Judgment Analysis — extract key holdings from uploaded judgment PDFs.

12. BILLING & EXPENSE MANAGEMENT

12.1 Overview

The Billing module tracks all professional fees, court expenses, and travel costs. It generates invoices, receipts, and outstanding reports, and integrates with the matter and client records for complete financial transparency.

12.2 Generating an Invoice

1	Open Invoice Modal Click 'Generate Invoice' on the Billing page or use the Quick Action on the Dashboard.
2	Select Client & Matter Choose the client and the linked matter.
3	Select Fee Type Choose: Appearance Fees, Retainer, Drafting Fees, Filing Charges, Consultation, or Court Fees.
4	Enter Amount Enter the fee amount in INR.
5	Set Dates Set the Invoice Date and Payment Due Date.
6	Add Description Enter a description of services rendered (e.g., 'SC Hearing Fees — 17 Jun 2026').
7	Generate Click 'Generate Invoice'. The invoice is assigned a unique Invoice Number (INV-YYYY-NNN) and the status is set to 'Unpaid'.

12.3 Invoice Status Lifecycle

Status	Meaning	Colour
Unpaid	Invoice generated; payment not yet received	Amber
Paid	Full payment received and confirmed	Green
Overdue	Payment due date has passed; payment not received	Red
Partially Paid	Partial payment received; balance outstanding	Amber

12.4 Billing Dashboard KPIs

- Billed This Month — total invoices raised in the current calendar month.

- Outstanding — total unpaid and overdue invoice amounts.
- Received — total payments collected in the current month.
- Expenses — court fees, travel, filing charges logged as expenses.

13. ADVOCATE DIARY

13.1 Overview

The Advocate Diary provides a visual calendar and daily planner that consolidates all court hearings, client meetings, filing deadlines, and personal appointments for each advocate. Days with events are marked with an amber dot on the calendar grid.

13.2 Calendar View

A monthly calendar grid is displayed with day-of-week headers (Mon–Sun). Today's date is highlighted in navy green. Click any date to view that day's timeline. Dates with events show a small amber indicator dot.

13.3 Daily Timeline

The right panel shows the selected day's timeline with all events in chronological order. Each entry shows the time, event type (Hearing / Meeting / Drafting / Deadline), and matter reference. Urgent hearings are highlighted with a red pulsing dot. Click 'Add Entry' to manually add a diary entry.

13.4 Views Available

- Day View — detailed hourly timeline for a single day.
- Week View — 7-day agenda showing all events.
- Month View — calendar grid with event indicators.

14. KNOWLEDGE REPOSITORY

14.1 Overview

The Knowledge Repository is the firm's internal legal library. It stores judgments, case laws, legal articles, draft templates, and practice notes, all searchable by keyword, court, practice area, and date.

14.2 Repository Tabs

- Judgments — landmark and recent judgments categorised by practice area (GST, IBC, RERA, Tax, Constitutional, etc.).
- Templates — standard format documents (petitions, affidavits, vakalatnamas, applications, etc.) ready to download and customise.
- Articles — internal legal memos, practice notes, and client advisories authored by firm advocates.

14.3 Adding Resources

Click '+ Add Resource' to upload a new judgment, template, or article. Assign a title, court/source, practice area tag, and optionally extract full text for OCR search.

15. USER MANAGEMENT

15.1 Overview

User Management is accessible only to Admins. It covers user creation, role assignment, permissions configuration, session monitoring, and security policy enforcement.

15.2 Inviting a New User

1	Open Invite Modal Click '+ Invite' on the User Management page.
2	Fill User Details Enter: Full Name, Email, Mobile, Designation (from master), Department (from master), Bar Council Number (if advocate).
3	Assign Role Select a role: Admin / Senior Advocate / Advocate / Clerk / Read-only. Role determines default permissions.
4	Send Invite Click 'Send Invite'. The user receives an email with an activation link valid for 48 hours.
5	First Login New user clicks the activation link, sets a password, and registers MFA. Account becomes active immediately.

15.3 Editing a User

Click the edit icon on any user row to open the Edit User modal with four tabs:

- Profile — update name, email, mobile, role, status, and department.
- Permissions — granular permission toggles (15 system permissions). Admin can override role defaults.
- Sessions — view all active login sessions; kill individual sessions remotely.
- Activity — view audit log of user's recent actions.

15.4 Permission System

Permission	Admin	Sr. Adv.	Advocate	Clerk	Read-only
View All Matters	✓	✓	✓	✓	✓
Create Matters	✓	✓	✓	✗	✗
Edit Matters	✓	✓	✓	✗	✗
Delete Matters	✓	✗	✗	✗	✗
Upload Documents	✓	✓	✓	✓	✗
Delete Documents	✓	✓	✗	✗	✗
Manage Tasks	✓	✓	✓	✓	✗

Permission	Admin	Sr. Adv.	Advocate	Clerk	Read-only
View Billing	✓	✓	✗	✓	✗
Create Invoices	✓	✓	✗	✗	✗
Manage Clients	✓	✓	✗	✗	✗
Export Data	✓	✓	✗	✗	✗
Manage Users	✓	✗	✗	✗	✗
System Settings	✓	✗	✗	✗	✗
View Audit Log	✓	✗	✗	✗	✗

15.5 Security Controls

- Force MFA for all users — mandatory OTP on every login.
- Maximum failed login attempts — lockout after 5 failed attempts (configurable).
- Session timeout — auto-logout after inactivity (default: 1 hour).
- IP Whitelist — restrict login to approved IP ranges only.
- Audit Trail — every action (login, data change, export, deletion) is logged with user, timestamp, and IP.

16. MASTERS ADMINISTRATION

16.1 Overview

Masters are the centralised configuration tables that power all dropdown menus across the platform. Any value added, edited, or reordered in a master is immediately reflected in all forms, filters, and reports system-wide. Only Admins can access the Masters page.

16.2 Available Masters

Master	Purpose	Default Count
Courts & Forums	All court/forum options in matter and tracker dropdowns	20
Matter Types	Types of legal matters (Litigation, Arbitration, Advisory, etc.)	12
Practice Areas	Legal practice areas for matter categorisation	12
Hearing Stages	Stages of hearing progression (Filing → Judgment)	10
Task Types	Categories of legal work tasks	12
Priority Levels	Task and matter priority classifications	4
Document Types	Types of legal documents for DMS and filing	15
Filing Stages	Lifecycle stages of a filing (Draft → Filed)	8
Client Types	Categories of clients (Individual, Corporate, Govt., etc.)	8
Designations	Job titles for user profiles	10
Departments	Practice group/department names	12
Advocates	Internal advocate names for assignment dropdowns	8

16.3 Managing Master Values

1	Open Masters Page Click 'Masters' in the sidebar under Admin.
2	Select a Master Click the card for the master you wish to edit (e.g., 'Courts & Forums').
3	Add Value Type the new value in the input field and click '+ Add' or press Enter.
4	Edit Value Click on any existing value text — it becomes editable inline. Click elsewhere to save.

5	Reorder Use the ↑ ↓ arrow buttons to change the display order. Ordering here controls the dropdown sequence in all forms.
6	Delete Click the trash icon to delete a value. A confirmation prompt appears.
7	Save Click 'Save Changes' to commit all edits. Changes propagate instantly platform-wide.

Important: Deleting a master value does not affect historical records. Existing matters, tasks, or filings linked to that value retain it; only new entries will not see it in dropdowns.

17. REPORTS & ANALYTICS

17.1 Standard Reports

Report Name	Description	Export Formats
Court-wise Case Report	Count and listing of matters by court forum	PDF, Excel
Advocate Workload Report	Tasks and matters per advocate with completion rates	PDF, Excel
Revenue Analysis (FY)	Monthly billing, collection, and outstanding by client	PDF, Excel
Matter Ageing Report	Matters grouped by age (0–3 months, 3–6 months, 6+ months)	PDF, Excel
Client-wise Statement	All matters, filings, and billing for a specific client	PDF, Excel
Filing Analysis	Pending, filed, and defective filings by court and date range	PDF, Excel
Hearing Analysis	Hearings by court, advocate, and month	PDF, Excel

17.2 KPI Summary (Reports Dashboard)

- Total Matters registered in the financial year.
- Win Rate — matters decided in client's favour as a percentage of total decided matters.
- Revenue collected vs. target for the financial year.
- New clients onboarded vs. prior year.

17.3 Exporting Reports

Click the PDF or Excel button next to each report. PDF is formatted for printing and client sharing. Excel provides raw data for custom analysis in spreadsheet tools.

18. SETTINGS

18.1 Profile Settings

Each user can edit their own Profile Settings — Full Name, Bar Council Number, Mobile, and Email. Click 'Save Profile' to commit changes.

18.2 Appearance

Four themes are available: Court Green (default), Navy Blue, Corporate Grey, and Dark Mode. Dark mode inverts the colour scheme with a dark background suited for night-time work. The toggle in the topbar bar provides instant dark/light mode switching.

18.3 Security Settings

Users can view their own security status (MFA enabled/disabled, encryption, audit trail) and change their password. Admins can enforce password policies and session timeout durations from the User Management page.

18.4 Notification Preferences

Notification Type	Channel	Default Setting
Hearing Reminders	WhatsApp	On · 7:00 AM daily
Filing Due Alerts	Email	On
Task Overdue Alerts	Browser Push	On
Judgment/Order Upload	SMS	Off
Daily Cause List	WhatsApp	7:00 AM

19. BACKUP & RESTORE

19.1 Backup Options

Backup Type	Description	Frequency
Manual Backup	Admin-triggered full backup of all data and documents	On demand
Scheduled Backup	Auto-backup triggered at configured intervals	Daily (default 2:00 AM)
Cloud Backup	Backup uploaded to S3-compatible cloud storage	Daily

19.2 Backup Formats

- ZIP — complete archive of documents and database export.
- JSON — structured data export for API-based integration.
- SQL — database dump for DBA-level restore operations.

19.3 Restore Options

- Full Restore — complete system restore to a prior backup point. Used after catastrophic failure.
- Partial Restore — restore selected modules (e.g., only Matters, only Documents) without overwriting other data.
- Matter-wise Restore — restore all data (matters, documents, tasks, timeline) for a specific matter number. Useful for accidental deletion.

19.4 Restore Procedure

6. Admin navigates to Administration > Backup & Restore.
7. Selects the backup file from local storage or cloud.
8. Selects restore type: Full / Partial / Matter-wise.
9. System performs a pre-restore validation check.
10. Admin confirms; restore executes. Users are notified of downtime.
11. System sends confirmation email on successful restore.

20. TECHNICAL ARCHITECTURE

20.1 Technology Stack

Layer	Technology
Frontend	HTML5, CSS3, JavaScript, React (SPA)
Backend	Node.js / Java Spring Boot
Database	PostgreSQL
Search Engine	ElasticSearch (OCR & full-text)
Document Storage	S3-Compatible Object Storage
Mobile	Flutter (Android & iOS)
API	REST + GraphQL
Deployment	Cloud (AWS/Azure/GCP) + On-Premise
Architecture	Microservices
PWA	Mandatory (offline support)
Multi-Tenant	Mandatory (firm-isolated data)
White Labelling	Mandatory (custom domain & branding)

20.2 Security & Compliance

- DPDP Act (India) — Digital Personal Data Protection Act compliant.
- ISO 27001 — Information Security Management System certified.
- CERT-In Guidelines — follows Indian Computer Emergency Response Team security guidelines.
- AES-256 Encryption — all data at rest and in transit is encrypted.
- Role-Based Access Control (RBAC) — granular permission matrix per user.
- Audit Trail — immutable log of all user actions with timestamp and IP.
- Multi-Factor Authentication (MFA) — mandatory on every login.
- IP Restriction — login allowed only from whitelisted IP ranges.

20.3 Deployment Options

- Cloud SaaS — hosted on TUBA-managed cloud infrastructure. Zero maintenance for the firm.
- On-Premise — installed on the firm's own servers. Suitable for PSU/Government deployments requiring data sovereignty.
- Hybrid — documents on-premise, application layer on cloud.
